Tab Explanation and Step-by-Step User Guide

This guide explains each main tab and training workspace tab in the Q-Learning Management System, what information appears there, who normally uses it, and the exact steps for common work. It is written for Admin, Trainer, and Trainee users.

Reference style: module purpose, information displayed, main actions, workflow, permissions, and controls. The guide follows the implemented application routes and role checks.

System Flow

End-to-end process: Sign in -> Review role dashboard -> Create or open a training -> Assign trainers, healthcare centres, devices, and trainees -> Publish learning content and tests -> Record attendance and practical outcomes -> Complete assessments -> Review and release results -> Issue or download certificates -> Track recertification reminders

Sidebar Structure Overview

This navigation map shows the left sidebar used by staff and the simpler navigation available to trainees.

Left Sidebar / Navigation

- |-- **Dashboard**
 - | |-- Staff: filters, KPIs, training status, reminders, registrations
 - | `-- Trainee: quick actions, learning progress, certificates, recent trainings
- |-- **Trainings**
 - | |-- Training list and filters
 - | |-- Create or import training, staff only
 - | `-- Training workspace tabs
 - | |-- Stream / Materials / Tests / Course / People
 - | |-- My Results, trainee when released
 - | |-- Marks / Attendance / Package, staff
 - | |-- Practical Learning Outcomes, Admin for main training
 - | `-- Settings, staff
- |-- **Trainees, Admin/Trainer**
- |-- **Question Bank, Admin/Trainer**
- |-- **Settings, Admin/Trainer**
 - | |-- Modules / Training Titles / Objectives / Healthcare
 - | |-- Areas of Specialization / Device Serial Numbers / Device Models
 - | |-- Practical Learning Outcomes
 - | `-- Users, Admin only
- |-- **Profile / Logout**

Sidebar tab	Sub pages/actions	Access note
Dashboard	Role-specific KPIs, filters, quick actions, reminders, progress, certificates.	All roles.
Trainings	Browse/filter trainings; staff create/manage; open the training workspace.	All roles; records are filtered by assignment/enrollment .
Trainees	Search, view, create, edit, import, and bulk account actions.	Admin and Trainer.
Question Bank	Search/filter, create, edit, delete, download template, bulk upload.	Admin and Trainer.
Settings	Manage LMS reference data and staff accounts.	Admin and Trainer; Users is Admin only.
Profile	Personal details, profile image, password, and staff certificate upload.	All roles.

Main area	Purpose	Typical users
Dashboard	Daily view of training activity, progress, reminders, and shortcuts.	All roles
Trainings	Central list for the full training lifecycle.	Admin, Trainer, Trainee
Training Workspace	Content, people, tests, marks, attendance, packages, and settings for one training.	Role-dependent
Trainees	Participant account and training-history administration.	Admin, Trainer
Question Bank	Reusable assessment questions grouped by learning context.	Admin, Trainer
Settings	Reference lists used by registration, training creation, testing, and certification.	Admin, Trainer
Profile	Self-service identity, security, and professional information.	All roles

Role Access

Access is controlled by the role stored in the signed-in session. Training visibility is also limited by assignment, enrollment, status, and lock state.

Role	Can view	Can change
Admin	All trainings, staff dashboard, trainees, question bank, settings, profiles, reports, and certificates.	Create/import/manage trainings, grade and release, manage attendance, reference data, and staff users.
Trainer	Assigned in-progress/completed/rescheduled trainings, staff dashboard, trainees, question bank, non-user settings, and profile.	Create trainings, manage assigned training content, attendance, grading, packages, trainees, questions, and allowed reference data.
Trainee	Own dashboard, enrolled unlocked trainings, permitted materials/tests, own attendance/results, certificates, and profile.	Update allowed profile fields, upload a profile picture, change password, and complete available tests.

1. Dashboard

Purpose: The Dashboard is the starting point after sign-in. Staff receive an operational reporting view, while trainees receive a personal learning-progress view.

Information Displayed

- Staff: total, in-progress, completed, canceled, and rescheduled trainings; completion and assessment pass rates.
- Staff: dashboard date, healthcare, and module filters, plus downloadable dashboard PDF.
- Staff: top clients, healthcare training reminders, upcoming recertifications, trainee status, trainers, and recent registrations.
- Trainee: quick links to trainings and profile, learning-progress metrics, certificates, and recent enrolled trainings.
- Training cards show current status and the next relevant action for the signed-in user.

How To Review Staff Activity

1. Open Dashboard after signing in as Admin or Trainer.
2. Set the date range and, when needed, filter by healthcare centre or module.
3. Review training totals, completion rate, assessment pass rate, and the status breakdown.
4. Check healthcare reminders and upcoming recertifications for follow-up work.
5. Use Quick Actions to open Trainings, Trainees, or Question Bank.
6. Click Download PDF when a formal dashboard summary is required.

How A Trainee Reviews Progress

1. Open Dashboard after signing in.

2. Review Learning Progress and the checklist on each recent training.
3. Click Continue or Review to open an enrolled training.
4. Open Results when scores have been released.
5. Use My Certificates to open an available certificate.

2. Trainings

Purpose: Trainings is the central list for creating, finding, opening, and tracking learning programmes. Admin sees all records, Trainer sees assigned eligible records, and Trainee sees enrolled unlocked records.

Information Displayed

- Training title, type, status, trainers, healthcare centres, dates, and enrollment count.
- Filters for status, trainer, healthcare, device, training type, and free-text search.
- Pending mark-release notifications for staff when follow-up is required.
- Create Training for staff and controlled Excel import for authorized administration.
- Default header artwork when a training has no custom header image.

How To Find And Open A Training

1. Open Trainings from the sidebar or dashboard.
2. Use search to find a title, description, or trainer.
3. Apply status, trainer, healthcare, device, or type filters when the list is large.
4. Open the matching training card.
5. If access is denied, confirm that the trainer is assigned or the trainee is enrolled and that the training status and lock state permit access.

How To Create A Training

1. Sign in as Admin or Trainer and click Create New Training.
2. Choose the training title, description, type, module, device model, affiliated company, start date/time, and end date/time.
3. Confirm the required module, device model, start time, and end time.
4. Select additional trainers; the creator is added automatically.
5. Select one or more healthcare centres, then choose trainees from those centres.
6. Select device serial numbers or add approved custom serial numbers.
7. Click Create Training, then open its workspace to add course content, tests, and operational settings.

Training Status And Locking

- Admin can see every status; non-admin visibility is limited to in-progress, completed, and rescheduled training records.
- Trainees cannot open a locked training and should use released certificate/result paths when available.
- Locking makes the workspace read-only and disables content-changing controls.
- Use status changes carefully because they affect who can see the training.

3. Training Workspace Tabs

Purpose: Opening a training shows a role-specific workspace. The available tabs change according to the signed-in role, training type, enrollment, score release, and lock state.

Tab	Purpose	Access
Stream	Training banner, description, overview, materials, and training media.	All authorized users
Materials	Trainee-focused material list and access links.	Trainee
Tests	Available pre-test, post-test, certificate enrolment, or refresher assessments.	Trainee
Course	Sections, materials, media, tests, results, and attendance shortcuts.	All authorized users; editing for staff
People	Assigned trainers and enrolled trainees.	All authorized users
My Results	Released marks, objective understanding, attendance, and certificate access.	Trainee after release
Marks	Scores, attempts, practical grading, result release, and certificate actions.	Admin/Trainer
Attendance	Summary, new attendance session, and session history/details.	Admin/Trainer
Package	Generate coordinated training documents, PDFs, spreadsheets, and ZIP package.	Admin/Trainer
Practical Learning Outcomes	Define main-training practical evaluation criteria.	Admin, main training
Settings	Edit training details, assignments, devices, status, and lock controls.	Admin/Trainer

How Staff Manage Course Content

1. Open the training and select Course.
2. Create a section or import sections from another training.
3. Add a material as a video, document, image, or link and place it in the intended section.
4. Set material visibility and any access expiry required by the workflow.
5. Upload training media when photographs or evidence should appear in the course gallery.
6. Open Tests or the test configuration within the training workflow to confirm each required assessment is available.
7. Recheck the trainee view before delivery.

How Staff Record Attendance

1. Open the training and select Attendance.

2. Review the attendance summary and any existing sessions.
3. Open Add New Attendance, enter the date, start time, and end time.
4. Mark each trainee Present or Absent and add optional notes.
5. Use the bulk present/absent controls when appropriate, then save.
6. Open session details or a trainee attendance record to verify totals and attendance rate.

How Staff Grade And Release Results

1. Open Marks and review the best attempt for each required test.
2. For a main training, grade every Practical Learning Outcome criterion.
3. Open test answers or all attempts when a score needs verification.
4. Admin releases main-training scores after the required tests and practical evaluation are complete; refresher release can be performed by authorized staff.
5. Use the exceptional certificate-release action only when the interface permits it and record the required justification.
6. Confirm that the trainee can now see My Results and the intended certificate action.

How A Trainee Completes A Training

1. Open an enrolled training from Dashboard or Trainings.
2. Read Stream and Course, then open Materials for the learning resources.
3. Use Tests to start each available assessment and submit answers before leaving the attempt.
4. Review People and Attendance when participation information is needed.
5. After staff release scores, open My Results to review tests, practical outcomes, final grades, and certificate availability.
6. Download or open the certificate only when eligibility and release rules are satisfied.

4. Trainees

Purpose: Trainees is the staff administration tab for participant accounts, identity details, healthcare assignment, device information, registration status, and training history.

Information Displayed

- Name, trainee ID, email, healthcare, IC/passport, handphone, device details, status, and training history.
- Search and filters for quickly finding a participant.
- Create, view, and edit actions.
- Excel template download and bulk import.
- Bulk status changes and bulk delete for selected records.

How To Add Or Edit A Trainee

1. Open Trainees and click Create Trainee, or find an existing record and click Edit.
2. Enter or confirm identity, contact, healthcare, specialization, designation, device, and account-status details.
3. Check that the email and unique identity fields do not conflict with an existing account.
4. Save the record.

5. Open the trainee detail view to confirm training and profile information.

How To Import Or Update Many Trainees

1. Download the trainee import template.
2. Complete the spreadsheet using the template headings and accepted values.
3. Open Import trainees from Excel and choose the completed file.
4. Review validation messages and correct rejected rows.
5. Run the import and verify the new or updated records.
6. For existing records, select rows and use bulk status only after confirming the scope; use bulk delete with extra care.

5. Question Bank

Purpose: Question Bank stores reusable assessment questions for training tests. It supports individual editing and spreadsheet-based bulk preparation.

Information Displayed

- Question text and answer options.
- Correct-answer configuration and the related module/objective context.
- Search and filters for locating questions.
- Edit and delete actions for existing questions.
- Template download and bulk upload with validation feedback.

How To Create Or Edit A Question

1. Open Question Bank and click Create Question, or click Edit on an existing question.
2. Select the relevant learning context such as module and objective.
3. Enter clear question text and the answer options.
4. Mark the correct answer exactly as required by the test engine.
5. Save and return to the list.
6. Use filters to confirm the question appears in the intended group.

How To Bulk Upload Questions

1. Download the Question Bank bulk template.
2. Enter questions using the supplied columns and accepted reference values.
3. Upload the completed spreadsheet.
4. Review validation errors before confirming the import.
5. After import, search for a sample of the new questions and verify their options and correct answers.

6. Settings

Purpose: Settings contains the reference lists used by registration, training creation, assessment grouping, device assignment, practical grading, and staff access.

Settings tab	Purpose	Important actions
Modules	Group trainings and questions into learning modules.	Search, add, edit, delete
Training Titles	Maintain reusable training names and descriptions.	Search, add, edit, delete
Objectives	Maintain learning objectives used by questions and scoring.	Search, add, edit, delete
Healthcare	Maintain healthcare centres and reminder details; CRM may also synchronize records.	Search, add, edit, delete with protected identity fields
Areas of Specialization	Maintain professional specialization values.	Search, add, edit, delete
Device Serial Numbers	Maintain serial numbers linked to device models.	Search, add, edit, delete
Device Models	Maintain available medical-device models.	Search, add, edit, delete
Practical Learning Outcomes	Maintain reusable criteria for main-training assessment.	Search, add, edit, delete
Users	Manage Admin and Trainer accounts and staff certificates.	Admin only

How To Maintain Reference Data

1. Open Settings and choose the required reference list.
2. Search first to avoid creating a duplicate value.
3. Click Add, complete the required fields, and save.
4. Use Edit when a label or relationship changes.
5. Delete only after confirming that the value is not required by existing training or assessment records.
6. For healthcare records, remember that CRM synchronization and protected identity-field rules may apply.

How Admin Manages Staff Users

1. Sign in as Admin and open Settings > Users.
2. Search for an existing account before creating a new one.
3. Add or edit the staff member's identity, email, role, professional details, password, and certificate information as required.
4. Save the account and test the intended role access.
5. Delete a staff account only after reviewing training assignments and audit implications.

7. Profile

Purpose: Profile lets each signed-in user maintain allowed personal information, profile picture, and password. Staff can also store a professional certificate.

Information Displayed

- All roles: name, email, role or trainee ID, profile picture, and password controls.
- Staff: position, phone number, areas of specialization, and certificate upload/view.
- Trainee: healthcare, designation, specialization, device serial number, training dates, recertification date, completed-training count, and account status.
- Some trainee identity and assignment fields are read-only in self-service Profile.

How To Update Profile And Password

1. Open Profile from the user area.
2. Update the editable personal or professional fields and click Update Profile.
3. Use Upload Picture to replace the profile image when needed.
4. Staff may upload a certificate as a PDF or image within the displayed file-size rule.
5. For a password change, enter the current password, new password, and confirmation.
6. Click Change Password and sign in again if the session is ended.

8. Tests, Results, Attendance, And Certificates

Purpose: These linked functions record assessment attempts, practical outcomes, attendance, final grades, score release, and certificate eligibility for each enrollment.

Assessment And Result Logic

- Main training can include pre-test, post-test, Practical Learning Outcomes, and certificate enrolment assessment.
- Refresher training uses its configured assessment path, including certificate enrolment when available.
- The system stores completed attempts and uses the best completed score where the result workflow requires it.
- Trainees see released results only for their own enrollment.
- Certificate availability depends on completed assessments, required thresholds, practical outcomes for main training, lockout rules, and any authorized release override.

How To Review One Enrollment

1. Open the training and select Marks, or open the trainee from a result/attendance shortcut.
2. Review test attempts, objective understanding, Practical Learning Outcomes, and attendance totals.
3. Confirm final-grade calculations after all required inputs are present.
4. Release results only when the record is complete and verified.
5. Open the certificate preview and confirm participant name, training details, and issue information before distribution.

System Controls And Good Practice

Required Fields And Validation

- Training creation requires valid dates, a module, a device model, participating healthcare centre(s), and at least one trainee.
- Email and unique identity fields must remain unique across the applicable user table.
- Bulk files must keep the provided headings and accepted values.
- Attendance sessions require date, start time, end time, and a status for each included trainee.
- Result release should wait until all required assessments and practical criteria are complete.
- Locked trainings should be treated as read-only.

Recommended Operating Routine

1. Start on Dashboard and review reminders, recertifications, pending releases, and recent registrations.
2. Open Trainings and confirm dates, status, assigned trainer, healthcare centres, devices, and trainees.
3. Prepare sections, materials, tests, and Practical Learning Outcomes before delivery.
4. Record attendance for every session and verify exceptions.
5. Review attempts and practical scores, calculate grades, then release results.
6. Generate the training package and confirm certificate availability.
7. Lock or complete the training only after the operational record is finished.

Complete Information Flow

LMS flow: Registration or staff-created trainee -> Healthcare, specialization, device, and profile data -> Training creation and enrollment -> Sections, materials, tests, and training media -> Attendance and assessment attempts -> Practical grading and final grades -> Score release -> Certificate and recertification tracking -> Dashboard reporting and reminders
